JOHNNY WONDER

Q. "HOW DO OYSTERS MAKE PEARLS?"

LYLE CAMPAS, OF PITTSBURGH, PA., WINS A PRIZE FOR THIS QUESTION.

A.

Most jewelry is made from precious stones, mined from the earth. But pearls are formed inside the shells of creatures known as pearl oysters. Pearls are made of the same mother-of-pearl material that lines the inside of the oyster's shell. They are formed when a grain of sand or other foreign object gets inside the oyster's

shell and irritates the oyster's tender body. To stop the irritation, the oyster coats the invader with layer after layer of mother-of-pearl. After several years, a smooth, satiny ball has formed around the grain of sand, forming a lustrous pearl.

You can win a World Almanac if your question is selected. Send your name and age to JOHNNY WONDER, c/o this newspaper, P.O. Box 1388, (DA) Santa Cruz, CA 95061.
